For Windows:

- Right-Click on the image name.
- Choose "save target as" option to download/save file to your computer.

For Macs:

• Hold the Option key down while clicking on a file name. When you get it right, the browser will start the download (usually to your desktop).

Note that if you just click on the link, the browser will try to display it and you will get blank window, with a tiny red X in the upper left corner. You need to save the file to your computer, and not attempt to open it in the browser.
